

HOMILOID®

Small Scale
Wet or Dry
Size Reduction

FITZ®MILL

VERSATILE SIZE REDUCTION

The Homiloid® can be utilized to meet all of your small scale size reduction requirements.

WET MILLING

The Homiloid® has been incorporated into the following wet applications:

- Size reduction of wet massed particles
- Smoothing of ointments and dispersion of solids into liquids
- Production of stable emulsions at high efficiency and capacities.

DRY MILLING

- Pulverizing of granular products to fine powders.
- Coarse granulating to achieve a free flowing granule with minimal dust.
- Delumping of agglomerated powders or granules.

BENEFITS

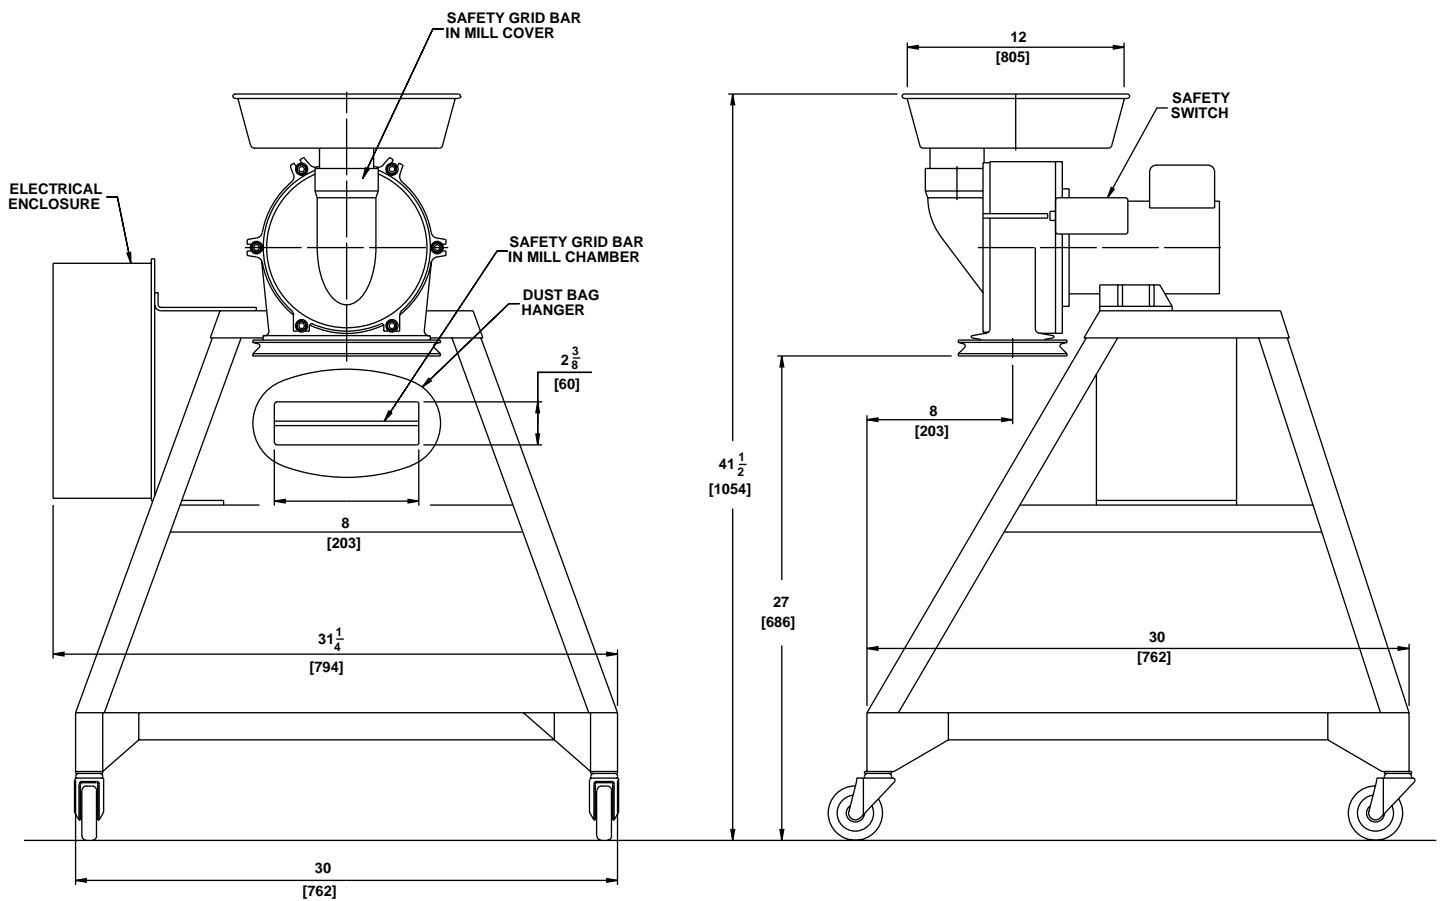

- Process batch sizes from 1/2 kg. to 50 kg.
- Liquids/solids processing
- Minimal floor space requirement
- Easily disassembled and cleaned
- All product contact parts constructed of stainless steel
